

Blomberg Dryer Error Codes

Quick Reference for Metro Vancouver Homeowners 2026

The six common codes

E03	Drain pump issue	Empty tank, check drain hose for kinks, clear any blockage.
E08	Heating sensor fault	Clean door filter and secondary condenser filter.
E09	Door latch or switch	Check door closes fully. Inspect latch hook for wear.
E13	Water tank full	Empty condensate tank or check drain hose level.
E14	Airflow restriction	Vacuum the secondary condenser filter behind kick panel.
E15	Temperature sensor	Tech diagnostic with multimeter required.

Before you call for service

1 Empty the condensate tank.

Tank slides out at the top of the unit. Pour into the sink and reinsert.

2 Clean the door lint filter.

Brush, rinse if waxy, dry fully, reinstall.

3 Vacuum the secondary condenser filter.

Open the kick panel at the bottom front. Slide out the cartridge. Vacuum the foam screen.

4 Check the door latch.

Open and close firmly. Listen for the click. Wiggle latch hook for play.

5 Power cycle the unit.

Unplug for 60 seconds, plug back in, run a short cycle.

When to call a technician

Code persists after both filters are cleaned and a power cycle. E15 sensor codes. Any code accompanied by burning smells, sparking, or breaker trips. Book a service appointment at asap-service.ca/book-now/ or call 604-441-2521.
