Washer Mildew Elimination Guide

Quick Reference Checklist

Use this quick reference guide to track down and eliminate hidden mold and mildew in your washing machine. Follow these steps to keep your laundry smelling fresh.

Hidden Areas to Check

- Inspect the gap between inner and outer tubs
- Check the rubber door gasket (boot) for moisture
- Clean the front load drain pump filter
- Remove detergent residue from dispensers

Cleaning the Door Boot

- Pull back rubber folds carefully
- Remove trapped lint, hair, and debris
- Scrub with vinegar or mildew cleaner
- Wipe dry with a clean microfiber cloth

Daily Habits for Freshness

- Leave the washer door open after cycles
- Wipe down the rubber gasket daily
- Use the correct amount of HE detergent
- Run a hot sanitizing cycle monthly
